Biochar for Environmental Management: Science, Technology and Implementation

Biochar for Environmental Management: Science, Technology and Implementation

Biochar is the carbon-rich product which occurs when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its persistence in soil and nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with potentially major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process.

The first edition of this book, published in 2009, was the definitive work reviewing the expanding research literature on this topic. Since then, the rate of research activity has increased at least ten-fold, and biochar products are now commercially available as soil amendments. This second edition includes not only substantially updated chapters, but also additional chapters: on environmental risk assessment; on new uses of biochar in composting and potting mixes; a new and controversial field of studying the effects of biochar on soil carbon cycles; on traditional use with very recent discoveries that biochar was used not only in the Amazon but also in Africa and Asia; on changes in water availability and soil water dynamics; and on sustainability and certification. The book therefore continues to represent the most comprehensive compilation of current knowledge on all aspects of biochar.

From reader reviews:

Latasha Sutterfield:

The experience that you get from Biochar for Environmental Management: Science, Technology and Implementation could be the more deep you digging the information that hide into the words the more you get interested in reading it. It doesn't mean that this book is hard to be aware of but Biochar for Environmental Management: Science, Technology and Implementation giving you thrill feeling of reading. The writer conveys their point in a number of way that can be understood through anyone who read this because the author of this guide is well-known enough. This book also makes your own personal vocabulary increase well. That makes it easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this specific Biochar for Environmental Management: Science, Technology and Implementation instantly.

Brad Marcum:

Hey guys, do you really wants to finds a new book to see? May be the book with the subject Biochar for Environmental Management: Science, Technology and Implementation suitable to you? The book was written by renowned writer in this era. The book untitled Biochar for Environmental Management: Science, Technology and Implementation is one of several books that everyone read now. This specific book was inspired lots of people in the world. When you read this reserve you will enter the new shape that you ever know prior to. The author explained their strategy in the simple way, so all of people can easily to be aware of the core of this guide. This book will give you a wide range of information about this world now. To help you to see the represented of the world on this book.

Mitchell Smith:

Beside this specific Biochar for Environmental Management: Science, Technology and Implementation in your phone, it may give you a way to get nearer to the new knowledge or data. The information and the knowledge you are going to got here is fresh through the oven so don't always be worry if you feel like an old people live in narrow community. It is good thing to have Biochar for Environmental Management: Science, Technology and Implementation because this book offers to you readable information. Do you at times have book but you do not get what it's all about. Oh come on, that would not happen if you have this inside your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book in addition to read it from currently!

India Mead:

A lot of guide has printed but it is unique. You can get it by internet on social media. You can choose the most effective book for you, science, comedian, novel, or whatever through searching from it. It is called of book Biochar for Environmental Management: Science, Technology and Implementation. You'll be able to your knowledge by it. Without departing the printed book, it could add your knowledge and make anyone

happier to read. It is most critical that, you must aware about book. It can bring you from one place to other place.
