## **Marine Enzymes for Biocatalysis: Sources, Biocatalytic Characteristics and Bioprocesses of Marine Enzymes (Woodhead Publishing Series in Biomedicine)** Antonio Trincone

Marine bioprospecting is a highly topical subject - in both applied and basic research - but, as yet, the marine ecosystem is a relatively unexplored source of natural bioactive substances with potential therapeutic activity. This book addresses the use of marine enzymes in biocatalysis through a series of chapters from leading scientists within academic and industrial fields. Biocatalytic processes can take advantage of the habitat-related properties of marine enzymes, such as salt tolerance, hyperthermostability, barophilicity, cold adaptivity, and so on, whilst also taking into consideration substrate specificity and affinity. These evolved properties are linked to the metabolic functions of the enzymes and to the ecological aspects of the natural source. New properties can also be discovered at the molecular level of catalysis, particularly concerning the stereochemical characteristics of products.

Marine enzymes for biocatalysis initially examines the nature and level of interest in marine biological diversity, and outlines the fundamentals of biocatalysis. It goes on to detail sources of marine enzymes, and to analyse examples from both chemical and stereochemical viewpoints of catalysis, including microbial enzymes and animal or plant sources. The book goes on to explore the future potential of marine bioprospecting in biocatalysis.

- Compiles studies from leading scientists in a direct and accessible format. Includes practical descriptions of results, adding further details not often covered in formal articles
- Takes a molecular view which fully explains the enzymatic aspects of reactions, particularly regarding biocatalytic characteristics and descriptions of bioprocesses
- Selects examples of chemical and stereochemical aspects of enzymatic action with respect to known terrestrial counterparts

**From reader reviews:**

**Alfonso Miller:**

Have you spare time for the day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a go walking, shopping, or went to typically the Mall. How about open or perhaps read a book titled Marine Enzymes for Biocatalysis: Sources, Biocatalytic Characteristics and Bioprocesses of Marine Enzymes (Woodhead Publishing Series in Biomedicine)? Maybe it is to be best activity for you. You know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with the opinion or you have various other opinion?

**Glenn Wallin:**

What do you about book? It is not important to you? Or just adding material when you need something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have spare time? What did you do? All people has many questions above. They need to answer that question due to the fact just their can do that will. It said that about publication. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need this specific Marine Enzymes for Biocatalysis: Sources, Biocatalytic Characteristics and Bioprocesses of Marine Enzymes (Woodhead Publishing Series in Biomedicine) to read.

**Jere Araujo:**

Nowadays reading books be a little more than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want send more knowledge just go with education and learning books but if you want sense happy read one with theme for entertaining like comic or novel. Often the Marine Enzymes for Biocatalysis: Sources, Biocatalytic Characteristics and Bioprocesses of Marine Enzymes (Woodhead Publishing Series in Biomedicine) is kind of guide which is giving the reader unstable experience.

**James Brown:**

The book untitled Marine Enzymes for Biocatalysis: Sources, Biocatalytic Characteristics and Bioprocesses of Marine Enzymes (Woodhead Publishing Series in Biomedicine) contain a lot of information on this. The writer explains her idea with easy method. The language is very simple to implement all the people, so do not really worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new period of time of literary works. It is possible to read this book because you can keep reading your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy

the e-book, you can start their official web-site in addition to order it. Have a nice go through.
