Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) I. Scott MacKenzie, Kumiko Tanaka-Ishii

Text entry has never been so important as it is today. This is in large part due to the phenomenal, relatively recent success of mobile computing, text messaging on mobile phones, and the proliferation of small devices like the Blackberry and Palm Pilot. Compared with the recent past, when text entry was primarily through the standard “qwerty” keyboard, people today use a diverse array of devices with the number and variety of such devices ever increasing.

The variety is not just in the devices, but also in the technologies used: Entry modalities have become more varied and include speech recognition and synthesis, handwriting recognition, and even eye-tracking using image processing on web-cams. Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry-increasingly, the way people communicate.

This book consists of four parts, and covers these areas: Guidelines for Designing Better Entry Systems (including research methodologies, measurement, and language modelling); Devices and Modalities; Languages of the world and entry systems in those languages; and variety in users and their difficulties with text entry-and the possible design and guideline solutions for those individual user groups.

This book covers different aspects of text entry systems and offers prospective researchers and developers

- * global guidelines for conducting research on text entry, in terms of design strategy, evaluation methodology, and requirements;
- * history and current state of the art of entry systems, including coverage of recent research topics;
- * specific guidelines for designing entry systems for a specific target, depending on devices, modalities, language, and different physical conditions of users

From reader reviews:

Ray Goodrow:

Here thing why that Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) are different and trusted to be yours. First of all looking at a book is good but it really depends in the content from it which is the content is as delightful as food or not. Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) giving you information deeper and different ways, you can find any book out there but there is no book that similar with Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies). It gives you thrill reading through journey, its open up your current eyes about the thing which happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in park your car, café, or even in your technique home by train. When you are having difficulties in bringing the imprinted book maybe the form of Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) in e-book can be your alternate.

Alice Scales:

Hey guys, do you wants to finds a new book to study? May be the book with the headline Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) suitable to you? The actual book was written by renowned writer in this era. The book untitled Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies) is the main one of several books that everyone read now. That book was inspired a number of people in the world. When you read this guide you will enter the new dimensions that you ever know prior to. The author explained their plan in the simple way, and so all of people can easily to recognise the core of this book. This book will give you a lots of information about this world now. To help you to see the represented of the world in this particular book.

Angela Joseph:

People live in this new day time of lifestyle always make an effort to and must have the time or they will get large amount of stress from both everyday life and work. So , whenever we ask do people have spare time, we will say absolutely of course. People is human not only a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, typically the book you have read is usually Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies).

Joseph Myrick:

What is your hobby? Have you heard which question when you got students? We believe that that question was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And also you

know that little person including reading or as reading become their hobby. You have to know that reading is very important and also book as to be the thing. Book is important thing to include you knowledge, except your teacher or lecturer. You will find good news or update about something by book. Numerous books that can you choose to adopt be your object. One of them is this Text Entry Systems: Mobility, Accessibility, Universality (Morgan Kaufmann Series in Interactive Technologies).
