The Heart, Kidney and Renal Failure: 20 Years of Nephrology: International Forum, Montecassino, June 1998 (Mineral and Electrolyte Metabolism, 25/2)

Special Topic Issue: Mineral and Electrolyte Metabolism 1999, Vol. 25, No. 1-2 This special issue is dedicated to the intricate relationship between failing heart and kidney function on the one hand and between failing kidney and cardiovascular events on the other. The crucial role of the kidney in establishing the fluid-sodium retention driven by hormonal changes, impaired filtration and afferent/efferent imbalance has long been recognized. When diuretic resistance supervenes, the left ventricular assist device and heart transplantation are the options. However, hemofiltration may buy time and allow the patient to recover some strength for the intervention. In this context, early treatment with growth hormones may also be of benefit. The main cause of death in dialysis patients is cardiovascular disease. A clustering of risk factors such as hypertension, anemia, age, smoking, homocysteine and reduced physical activity render these patients especially susceptible to cardiovascular disease. To modify each risk factor, holistic management is mandatory. This intervention should be initiated during the course of progressive nephron loss, well in advance of dialytic therapy. Prevention of cardiovascular complications is thus an integral part of the prevention of nephron loss. Nephrologists and cardiologists, as well as those in the fields of intensive care and general medicine, will find this special issue of particular interest.

From reader reviews:

Quincy Eddy:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Together with book everyone in this world could share their idea. Publications can also inspire a lot of people. A great deal of author can inspire their own reader with their story or even their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that you can get now. The authors in this world always try to improve their expertise in writing, they also doing some investigation before they write to their book. One of them is this The Heart, Kidney and Renal Failure: 20 Years of Nephrology: International Forum, Montecassino, June 1998 (Mineral and Electrolyte Metabolism, 25/2).

James Vazquez:

Spent a free a chance to be fun activity to do! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your free time/ holiday? May be reading a book could be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try look for book, may be the book untitled The Heart, Kidney and Renal Failure: 20 Years of Nephrology: International Forum, Montecassino, June 1998 (Mineral and Electrolyte Metabolism, 25/2) can be good book to read. May be it might be best activity to you.

Susan Rooks:

In this period of time globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended for you is The Heart, Kidney and Renal Failure: 20 Years of Nephrology: International Forum, Montecassino, June 1998 (Mineral and Electrolyte Metabolism, 25/2) this book consist a lot of the information in the condition of this world now. This specific book was represented just how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. Often the writer made some research when he makes this book. Here is why this book acceptable all of you.

Michael Patterson:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person similar to reading or as studying become their hobby. You need to understand that

reading is very important in addition to book as to be the matter. Book is important thing to include you knowledge, except your own teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them are these claims The Heart, Kidney and Renal Failure: 20 Years of Nephrology: International Forum, Montecassino, June 1998 (Mineral and Electrolyte Metabolism, 25/2).
