Prevention and Management of Venous Thromboembolism (Clinical Talk) Vish Bhattacharya, Gerard Stansby

Venous thrombosis occurs in all healthcare settings and all specialties in nursing and medicine. It causes more deaths every year than MRSA or road accidents and is not just a topic for experts and specialists. In spite of this, there is a lack of easily accessible information for non-experts on venous thromboembolism (VTE), and consequently the condition is often treated poorly and preventive measures are often used inconsistently.

Prevention and Management of Venous Thromboembolism takes the first step towards rectifying this dearth of information. It brings together a unique group of vascular surgeons, haematologists and other experts who help shape the management of VTE and is aimed at both the multi-disciplinary teams involved in the day-to-day care of patients with VTE, and allied health professionals and healthcare commissioners. The book's approach is broad and comprehensive and there are separate sections dealing with prevention, diagnosis and treatment. This is an expert-level book accessible to non-experts.
