Pattern Recognition Sergios Theodoridis, Konstantinos Koutroumbas

This book considers classical and current theory and practice, of supervised, unsupervised and semi-supervised pattern recognition, to build a complete background for professionals and students of engineering. The authors, leading experts in the field of pattern recognition, have provided an up-to-date, self-contained volume encapsulating this wide spectrum of information. The very latest methods are incorporated in this edition: semi-supervised learning, combining clustering algorithms, and relevance feedback.

Solutions manual, powerpoint slides, and additional resources are available to faculty using the text for their course.
