Poluição Marinha: Principais Aspectos é uma síntese de 15 anos de trabalhos e publicações voltados à poluição do ambiente marinho, em especial no Nordeste do Brasil. A contaminação da zona costeira e oceanos é discutida a partir de dados quantitativos e qualitativos. Ao longo do livro são apresentados os principais conceitos, fontes e tipos de poluição nos ambientes costeiros e marinhos. A interação do homem com o mar, representada pelo desenvolvimento acelerado dos núcleos urbanos em áreas costeiras, traz como consequência todo tipo de contaminação. Desta maneira, os capítulos ressaltam esta interação através da apresentação do Turismo como fonte de poluição marinha, os Esgotos Domésticos, Efluentes Industriais e o Lixo marinho.
