The Hands-on Guide to Practical Prescribing (Hands-on Guides) Oliver Jones, Nandan Gautam

The hands-on guide to practical prescribing is a concise, easy-to-use guide to the practical aspects of pharmacology for junior doctors who are making the transition from studying pharmacology to prescribing drugs for the first time.

This new addition to 'The hands-on guide' series brings together the core pharmacological knowledge required by house officers, structured in a way to address the very hands-on, practical aspects of prescribing. This book is not designed to replace the factual drug information in the BNF, but to complement and build upon it, so that The hands-on guide to practical prescribing provides junior doctors with a solid guide to prescribing in the clinical setting.

Beginning with the general principles of prescribing and basics of writing a prescription form, the book guides you through topics such as using the BNF, drug interactions and monitoring toxicity, before moving on to cover both surgical and medical topics such as preoperative and postoperative patients, prophylaxis, organ failure and diabetes.

The hands-on guide to practical prescribing is a problem-based book that covers the common problems and questions a house officer might encounter, and will be an invaluable guide to life on the wards. The authors are specialist registrars in medicine and surgery, have undertaken SHO and registrar posts in the major specialities and also write and teach regularly on clinical pharmacology.
