An Uncooperative Commodity: Privatizing Water in England and Wales (Oxford Geographical and Environmental Studies Series) Karen J. Bakker

The privatization of water supply is an emotive and controversial topic. The 'British model' of water privatization is unique: no other country has entirely privatized its water supply and sewerage systems. This book analyzes the socio-economic and environmental dimensions in privatization in England and Wales. It examines the implications of privatization for consumers, environmental management, and the water supply industry.
