Space Weather: 344 (Astrophysics and Space Science Library)

Jean (Ed.) Lilensten

Space Weather: 344 (Astrophysics and Space Science Library) Jean (Ed.) Lilensten

This book shows the state of the art in Europe on a very new discipline, Space Weather. This discipline lies at the edge between science and industry. This book reflects such a position with theoretic papers and applicative papers as well. It is divided into five chapters. Each chapter starts with a short introduction, which shows the coherence of a given domain. Then, four to five contributions written by the best specialists in Europe give detailed hints of a hot topic in space weather. From the reading of this book, it becomes evident that space weather is a living discipline, full of promises and already full of amazing realizations. The strength of Europe is clear through the book, but it is also clear that this discipline is worldwide.
