## Mastering Canon EOS Flash Photography NK Guy

Automatic flash technology has revolutionized photography. Originally seen as just a way of illuminating dark scenes with portable light, flash is used today for many creative functions, including supplementing daylight and designing complex scenes lit by multiple light sources.

Creating striking or natural-looking images using flash photography can be a difficult artistic and technical challenge. *Mastering Canon EOS Flash Photography* is the authoritative book on the subject, guiding the reader through Canon's Speedlite flash system, off-camera portable flash, and professional studio lighting. Covering the fundamentals of flash metering technology, it discusses key concepts, and documents the features and functions available with EOS gear. Highly illustrated, this book is loaded with examples and diagrams describing important functions and lighting arrangements, and beautiful photographs demonstrating sophisticated flash techniques. Foreword by David Hobby.
