Equitation Science

Paul McGreevy, Andrew McLean

Equitation Science Paul McGreevy, Andrew McLean

Equitation Science is one of those rare books that is going to change the way we train and manage horses forever. It brings together a fundamental understanding of the way horses think and behave and presents a system of modern training that has the welfare of the horse at its core – it must be the foundation work for the next generation of professional and amateur riders and trainers. Riders will ride better, trainers will train better and we will have happier, healthier horses.

—**Wayne Channon, International Grand Prix Rider**

Written by two internationally recognised experts, *Equitation Science* is the first book to draw together the principles of this emerging field into a much-needed coherent source of information.

The goal of equitation science is to enhance our understanding of how horses think and learn, and to use their natural behaviour to train, ride or compete with them in as fair a manner as possible. The welfare consequences of training and competing horses under different protocols are explored. Drawing on traditional and emergent techniques, this book incorporates learning theory into an ethical equine training system suitable for all levels. It also focuses on evidence-based approaches that improve rider safety.

I found this a very interesting and enlightening book. Equitation Science will help anyone involved with horses to understand them more and to be more effective in their training and education. The knowledge this brings to anyone involved with horses should help to make the horses' lives easier and therefore allow the partnership between humans and equines to flourish.

—**Yogi Breisner, British Eventing Performance Manager**

Equitation Science is an ambitious and thorough look at an enormous range of areas, approaches and factors concerning the training of horses. The authors have an underlying theme to their text of scientifically assessing and then also promoting the use of ethical and humane methods of horse training to increase all sport horses' welfare and happiness within their sporting requirements. Equitation Science also provides an invaluable insight as to how and why what we do with our horses actually works.

—**Paul Tapner, Professional International Advanced Eventing Rider, Badminton CCI**** 2010 Winner**

From reader reviews:

Archie Moriarty:

Here thing why this particular Equitation Science are different and reputable to be yours. First of all reading a book is good nevertheless it depends in the content of computer which is the content is as yummy as food or not. Equitation Science giving you information deeper as different ways, you can find any book out there but there is no reserve that similar with Equitation Science. It gives you thrill reading journey, its open up your personal eyes about the thing in which happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in park, café, or even in your technique home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Equitation Science in e-book can be your alternate.

Mary Grubb:

The book untitled Equitation Science contain a lot of information on that. The writer explains your girlfriend idea with easy way. The language is very simple to implement all the people, so do definitely not worry, you can easy to read it. The book was published by famous author. The author brings you in the new period of literary works. You can actually read this book because you can please read on your smart phone, or program, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and order it. Have a nice read.

Ilene Bixler:

That book can make you to feel relax. That book Equitation Science was multi-colored and of course has pictures around. As we know that book Equitation Science has many kinds or type. Start from kids until young adults. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book usually are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.

Alex Tipton:

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Equitation Science can make you experience more interested to read.
