Modelling the Tiger I (Osprey Modelling) Gary Edmundson, David Parker, Steve van Beveren, Dinesh Ned

The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. Probably the most famous tank of World War II, the Tiger was designed in response to the German Army's fighting experience in Western Europe, North Africa and Russia. Armed with the most powerful German gun, the famous 88mm, the Panzer VI Tiger was intended to dominate the battlefield from the East to the West.

In this book, some of the world's most talented modellers cover six separate Tiger projects, their work illustrated by a collection of step-by-step color photographs detailing everything from insignia to battle damage in a variety of combat theaters to illustrate the Tiger's full wartime experience. With varying degrees of difficulty, this will appeal to both experienced modelling enthusiasts and newcomers attempting their first project.
