Citation Analysis in Research Evaluation: 9 (Information Science and Knowledge Management)

Henk F. Moed

Citation Analysis in Research Evaluation: 9 (Information Science and Knowledge Management) Henk F. Moed

This book deals with the evaluation of scholarly research performance, and focuses on the contribution of scholarly work to the advancement of scholarly knowledge. It provides a wide range of important facts, and corrects a number of common misunderstandings about citation analysis. It introduces basic notions and distinctions, and deals both with theoretical and technical aspects, and with its applicability in various policy contexts. This book is also critical and underlines the limits of citation analysis in research evaluation. In order to be used properly as a research evaluation tool, it is essential that all participants have insight into the nature of citation analysis, how its indicators are constructed and calculated, what the various theoretical positions state about what they measure, and what are their potentialities and limitations, particularly in relation to peer review. This book aims at providing such insight.
