Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology)

Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology)

Metal ions play key roles in biology. Many are essential for catalysis, for electron transfer and for the fixation, sensing, and metabolism of gases. Others compete with those essential metal ions or have toxic or pharmacological effects.

This book is structured around the periodic table and focuses on the control of metal ions in cells. It addresses the molecular aspects of binding, transport and storage that ensure balanced levels of the essential elements. Organisms have also developed mechanisms to deal with the non-essential metal ions. However, through new uses and manufacturing processes, organisms are increasingly exposed to changing levels of both essential and non-essential ions in new chemical forms. They may not have developed defenses against some of these forms (such as nanoparticles).

Many diseases such as cancer, diabetes and neurodegeneration are associated with metal ion imbalance. There may be a deficiency of the essential metals, overload of either essential or non-essential metals or perturbation of the overall natural balance.

This book is the first to comprehensively survey the molecular nature of the overall natural balance of metal ions in nutrition, toxicology and pharmacology. It is written as an introduction to research for students and researchers in academia and industry and begins with a chapter by Professor R J P Williams FRS.

From reader reviews:

Lucille Chenier:

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make them survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to remain than other is high. In your case who want to start reading the book, we give you that Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology) book as nice and daily reading book. Why, because this book is usually more than just a book.

Jimmy Martinez:

The book Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology) has a lot info on it. So when you make sure to read this book you can get a lot of help. The book was published by the very famous author. The author makes some research before write this book. This kind of book very easy to read you can get the point easily after perusing this book.

Annette Dixon:

As we know that book is essential thing to add our information for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This e-book Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology) was filled in relation to science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading any book. If you know how big benefit of a book, you can truly feel enjoy to read a guide. In the modern era like right now, many ways to get book you wanted.

Rodolfo Born:

What is your hobby? Have you heard this question when you got learners? We believe that that question was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you also know that little person such as reading or as reading become their hobby. You should know that reading is very important as well as book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update concerning something by book. Numerous books that can you go onto be your object. One of them is this Binding, Transport and Storage of Metal Ions in Biological Cells (RSC Metallobiology).
