On-line LC-NMR and Related Techniques

On-line LC-NMR and Related Techniques

This book gives a comprehensive overview of the basis and the current applications of LC-NMR and related techniques. It deals with the practical aspects of the hardware and software set-up for a successful performance of on-line coupling experiments. It covers the solution of real-world problems from the fields of biomedical, pharmaceutical and environmental studies as well as the analysis of natural products and polymeric compounds. Thus guidelines for an efficient application of the powerful hyphenated technique LC-NMR in combination with LC-MS are presented. Besides LC-NMR, important techniques such as the on-line coupling of gel permeation chromatography and supercritical fluid chromatography, together with ^1H NMR spectroscopy, are described in detail.

Fascinating further aspects, such as the application of capillary separation techniques either in the single or parallel detection mode, together with the possibilities of direct ^{13}C monitoring of chromatographic events, are also discussed.

Key features include:

- * Up-to-date information on the theoretical and experimental methodology
- * Coverage of applications in biomedical, pharmaceutical and natural product analysis, as well as environmental polymer and related hyphenated techniques
- * Information appropriate for researchers in organic, pharmaceutical and medical chemistry

Overall, this book is a requirement for all researchers and staff members dealing with structure elucidation problems in separation science.

From reader reviews:

Darren Marshall:

Throughout other case, little folks like to read book On-line LC-NMR and Related Techniques. You can choose the best book if you want reading a book. Provided that we know about how is important a new book On-line LC-NMR and Related Techniques. You can add expertise and of course you can around the world with a book. Absolutely right, since from book you can know everything! From your country right up until foreign or abroad you will be known. About simple matter until wonderful thing you may know that. In this era, we can easily open a book as well as searching by internet system. It is called e-book. You should use it when you feel uninterested to go to the library. Let's study.

Cheri Whaley:

Do you one of people who can't read enjoyable if the sentence chained within the straightway, hold on guys this particular aren't like that. This On-line LC-NMR and Related Techniques book is readable by simply you who hate the straight word style. You will find the data here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to provide to you. The writer associated with On-line LC-NMR and Related Techniques content conveys thinking easily to understand by most people. The printed and e-book are not different in the content material but it just different by means of it. So , do you continue to thinking On-line LC-NMR and Related Techniques is not loveable to be your top checklist reading book?

Lois Silvey:

A lot of people always spent their particular free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity here is look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent all day long to reading a reserve. The book On-line LC-NMR and Related Techniques it doesn't matter what good to read. There are a lot of people that recommended this book. They were enjoying reading this book. When you did not have enough space to create this book you can buy the e-book. You can m0ore effortlessly to read this book from a smart phone. The price is not to cover but this book has high quality.

Belinda Hamilton:

People live in this new time of lifestyle always try to and must have the time or they will get large amount of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely yes. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer may unlimited right. Then ever try this one, reading ebooks. It can be your alternative with spending your spare time, the particular book you have read is actually On-line LC-NMR and Related Techniques.
