Sustainable Landscaping: Principles and Practices Marietta Loehrlein

While landscaping has the potential to be part of the solution to certain environmental problems, the quest for beauty can also produce effects that are harmful to the environment. **Sustainable Landscaping: Principles and Practices** examines landscape practices that adversely affect the environment, which occur in the process of constructing, implementing, and managing residential and commercial landscapes. It explores ways to change these practices to have a more positive effect, describing the principles of sustainable landscaping and proposing solutions to challenges that can arise.

This book covers a wide range of landscape practices that fall under the broad subject of sustainability, providing detailed coverage of principles including the following:

- Conducting sustainability audits
- Using plants to maximize their benefits
- Regulating solar heat gain and loss with seasonal climate changes
- Directing wind using plants to minimize heat loss in winter and maintain cooling breezes in summer
- Addressing water quantity and quality
- Managing storm water
- Understanding and improving soil health
- Minimizing the impact of pesticides and herbicides
- Conserving energy and reducing air pollution
- Managing resources and reducing waste

Each topic is introduced by providing background information and terminology, followed with practical solutions that are being implemented by landscape professionals. Written for a general audience—from students of landscaping to homeowners and professionals in the landscaping industry—this book provides background information and practical solutions, offering sustainable approaches to the way landscapes are designed and managed.

So now let us show you the relaxing pattern the following is your body and mind will probably be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

Michael Clark:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's soul or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country.

Therefore this Sustainable Landscaping: Principles and Practices can make you really feel more interested to read.
