Strategies and Tactics in Organic Synthesis: Chapter 11. Total Synthesis of Aspergillide C Joseph D. Panarese, Stephen P. Waters

In 2008, (+)-aspergillide C, a structurally novel marine metabolite bearing a 14-membered macrolactone around a 2,6-dihydropyran core, was isolated from a marine-derived fungus, *Aspergillus ostianus*. In a biological assay, (+)-aspergillide C displayed promising anticancer activity (LD₅₀=2.0 μg/ml) against mouse lymphocytic leukemia cells (L1210). Due to its notable biological activity and interesting architecture, we viewed aspergillide C as an attractive synthetic target. Moreover, the aspergillide scaffold could lend itself to diverse structural modifications in projected syntheses of biologically active congeners. In this account, we describe our enantioselective approach to aspergillide C from (S)-(-)-glyceraldehyde acetonide and the Danishefsky–Kitahara diene. Strategic transformations include a heterocyclocondensation reaction, a Ferrier-type addition, and a palladium-catalyzed oxidative lactonization to set key stereocenters within the dihydropyran core, followed by fragment coupling through an (E)-selective Julia–Kocienski olefination.

It all right you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Strategies and Tactics in Organic Synthesis: Chapter 11. Total Synthesis of Aspergillide C which is finding the e-book version. So , try out this book? Let's see.

John Negron:

Don't be worry when you are afraid that this book can filled the space in your house, you might have it in e-book technique, more simple and reachable. This specific Strategies and Tactics in Organic Synthesis: Chapter 11. Total Synthesis of Aspergillide C can give you a lot of pals because by you considering this one book you have thing that they don't and make an individual more like an interesting person. This book can be one of a step for you to get success. This book offer you information that maybe your friend doesn't understand, by knowing more than different make you to be great men and women. So , why hesitate? Let us
