Landscape and Sustainability

Landscape and Sustainability

This unique book is about landscape, sustainability and the practices of the professions which plan, design and manage landscapes at many scales and in many locations; urban, suburban and rural. Despite the ubiquity of 'sustainability' as a concept, this is the first book to address the relationship between landscape architecture and sustainability in a comprehensive way.

Much in the book is underpinned by landscape ecology, in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art. As this book argues, landscape is and must be much more than this; landscape architecture is about making places which are biologically wholesome, socially just and spiritually rewarding.
