Qualitative Research Methods is based on the authors' highly successful multidisciplinary qualitative methods workshops, which have been conducted for over a decade. In this book the authors propose a 'qualitative research cycle' that leads students through the selection of appropriate methods, the collection of data and the transformation of findings into a finished project. It provides a clear explanation of the nature of qualitative research and its key concepts. Topics covered include:

- o formulating qualitative research questions

- o ethical issues

- o in-depth interviews

- o focus group discussions

- o observation

- o coding

- o data analysis

- o writing up qualitative research

This text is ideal for any students taking a qualitative methods course or producing a qualitative research project at undergraduate or graduate level. It is illustrated throughout with case studies and field examples from a range of international contexts. The practical techniques are also accompanied by the author's own research tools including interview guides, real coded data and comprehensive research checklists.
